LinkedIn: <https://www.linkedin.com/in/ethan-schechter/>

Website: <https://ethans777.github.io/Website/>

OBJECTIVE:

Seeking a full-time position post-graduation as a web developer to apply my skills in JavaScript, UI/UX design, and front-end development as a whole. Passionate about contributing to impactful web projects while continuing to grow as a developer.

EDUCATION:

Rochester Institute of Technology - Rochester, NY

Bachelor of Science Degree (BS) in New Media Interactive Development

Class of 2026

- GPA: 3.80
- Dean's List: Fall 2021 through Fall 2025

SKILLS:

- Programming Languages: HTML, CSS, JavaScript, TypeScript, React, SQL, Node
- Version Control: Git
- Software Tools: Visual Studio Code, TouchDesigner, Unity, Figma, Adobe Photoshop & Illustrator
- Other Skills: UI/UX Design, Strong Time Management and Problem Solving

PROJECTS (More on Website):

Don't Run With Scissors (Capstone Project)

September 2025 - Current

- IGF Finalist, alt.ctrl.GDC 2026 (Game Developer's Conference)
- Alternate controller game integrating Arduino hardware and Unity
- Mapped physical gestures such as tilting to gameplay mechanics
- Collaborated in a team of nine on iteration, gameplay, and interaction design

Web Server API Creation (Academic Project)

September 2024 - October 2024

- Using Node.JS, I developed a web server that hosted a backend web API in which I created, and implemented a client-side page to display the data with CRUD operations, showcasing full-stack work.
- Designed and developed a responsive interface for the front-end side of the application, and ensured interaction between the client and server.
- Worked on error handling and handling various API responses.

EXPERIENCE:

Golisano College of Computing Co-Op - Web Developer

May 2025 - December 2025

- Implemented new website features and resolved UX-focused issues using React and TypeScript, contributing to a shared codebase via a collaborative Git workflow.
- Collaborated with team members to troubleshoot bugs and ensure alignment with project goals, contributing to a more stable and user-friendly application.
